

PROFILE

AI software engineer with over **2** years of remote programming experience using tools like **Python, JavaScript, HTML** and **CSS**. Skilled in creating software solutions to increase performance and optimize daily tasks. I am a driven individual and enjoy projects that require deep research and thinking.

SKILLS

Languages: **Python, SQL, LabView, JavaScript, HTML, Matlab**

Frameworks: **Pandas, NumPy, Matplotlib**

Tools: **GitHub, Visual Studio Code, Google Colab, Blender**

Spoken Languages: **English** (Native), **Portuguese** (proficient)

EXPERIENCE

AI Software Engineer

July 2024 – Present

Outlier AI, Remote

- Worked on over 4 long-term projects, improving the quality and accuracy of **AI language models** using **RLHF**.
- Responsible for reviewing and enhancing **Python** and **JavaScript** code provided by models to ensure it is optimized and functional.
- **Promoted** in multiple projects to review and partake in final production stages.
- Assigned to an exclusive group of high quality contributors to work on **advanced** and **high priority** projects.

Junior Data Analyst

March 2023 - May 2024

Lumcloon Energy, Ireland

- Created a in-depth database using automated **python web-scraping** programs to significantly reduce the time to conduct early-stage project research.
- Brought about the development of a new **GIS** and **spatial database**, involving the creation of an extensive training course for 6 members of staff.
- Developed an internal python program within GIS software to **automate** the site selection process for energy projects based on infrastructure criteria.

PROJECTS

Alex's Isle

March 2025

Interactive Resume Website

Created an interactive website showcasing my skills and experience. The project was made using the **ThreeJS** library in **JavaScript** along with **HTML** and **CSS** languages. This project allowed me to learn how 3D animations work and how to make them using **Blender** software. The site can be accessed [here](#).

DeBúrca Design

November 2024

Productivity Automation

Developed programs with **Python** to automate manual workload. Firstly, I integrated **API** into the **DeBúrca** website, facilitating the process of label creation and order tracking for the postage company. Along with this, tools were developed to ease management of inventory and current stock.

EDUCATION AND CERTIFICATIONS

Google Data Analytics Professional Certificate

July 2024 - September 2024

Google Career Certificates, Remote

- Learning complete data analytics life cycle including data cleaning, manipulation, analysis and presentation using **SQL** and **R** languages.

Bachelor of Science in Applied Physics

September 2020 - May 2024

University of Limerick, Limerick, Ireland

- **First Class Honours**
- Core concepts of learning included **Quantum Mechanics**, **Nanotechnology**, **Computational Physics**, and **Medical Instrumentation**.
- *Thesis*: Completed a notable research project on **non-synchronous generation** within Ireland, using a physical model and a simulated environment.

Leaving Certificate

September 2019 - June 2020

Limerick Tutorial College, Limerick, Ireland

- Attained 512 points of a possible 625 points.
- Completed higher level **Maths**, **Physics**, **Chemistry**, **Biology**, **English**.
